- Github Link

Problem Statement

- **Manual Process** – Invoices require manual downloads and sharing, causing delays and errors.

- **Tracking Issues** – No real-time tracking of invoice delivery or acknowledgment.

- **Payment Delays** – Lack of automated reminders results in overdue payments.

- **Limited Features** – Existing systems lack customization and follow-up automation.

- **Need for Integration** – Automating email invoicing improves efficiency and communication.

Module Design

Module 1: Invoice Generation
Creates invoices with customer, product, and tax details.
Generates unique invoice numbers and allows customization.

Module 2: Email Integration
Sends invoices via **SMTP or API-based email services**.
Supports custom email templates and automated reminders.
Tracks delivery, read receipts, and logs interactions.
